***Election/Restrictions***

Applicant's election with traverse of Group I and Species A, ZD, and iv in the reply filed on May 31, 2007 is acknowledged. The traversal is on the ground(s) that there is no undue burden in examining all claimed inventions and species. This is not found persuasive because the inventions and species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record. Moreover, there is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The inventions and species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

As to the argument that the species must be "independent and distinct", MPEP 802.01 directs the examiner to properly interpret the phrase "independent and distinct" as "independent or distinct."

The requirement is still deemed proper and is therefore made FINAL.

Claims 4-9, 12, 15, and 30-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 31, 2007.

***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c). The address of Michael Garrison was altered without initialing in the declaration filed July 7, 2004.

***Claim Objections***

Claims 2, 3, 10, 14, and 16 are objected to because of the following informalities:

With regard to claims 2, 3, and 16, line 2 of each claim, "the strut" lacks clear antecedent basis since three types of struts are set forth in claim 1. The Examiner suggests changing "the strut" to "the at least one of the struts" in order to overcome this objection.

With regard to claim 10, the use of "comprising" is confusing because the graft member has elements previously set forth therefor. The Examiner suggests changing "comprising" to ---further comprising--- in order to overcome this objection

With regard to claim 14, it is unclear whether "a prosthetic valve" is a modification of the valve of claim 13 or a second valve.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3738

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 10, 11, 13, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Pavcnik et al (WO 99/62431). Pavcnik anticipates the claim language where:

- the frame as claimed is the frame (11) of Pavcnik (see Figures 12 to 17);  
the first portion as claimed is the straight portion of the frame (11), and the second and third portions as claimed are the coil bends (12) on either side thereof; the widths of the second and third portions are greater due to the overlapping of the wire;
- the graft as claimed is the covering (57); see Figure 15;
- the attachment element as claimed is the suture (50); see page 7, line 30 to page 9, line 7.

With regard to claims 13 and 14, the Applicants are directed to page 8, lines 7-9 of Pavcnik.

With regard to claim 16, the angle as claimed can be zero degrees and still fall within the scope of the claims.

### ***Conclusion***

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending
